

KODAK IMOUSE Q90

WIRELESS PRESENTER WITH BUILT-IN
LASER POINTER & TIMER

POWERFUL LASER POINTER & TIMER

The Kodak IMOUSE Q90 is a wireless presenter with built-in laser pointer and timer. Perhaps the greatest feature about the IMOUSE Q90 is its built-in timer which helps you keeping track of how much time you have left in your presentation. The built-in motion sensor allows waving the mouse in air and the mouse pointer will move according to the waving motion, enabling you to have computer control from anywhere in the room. Its power laser pointer is bright and easy to see, providing more engagement between you and the audience. Last but not least, its compatibility with multiple different popular software for presentation makes it a great presenting peripheral companion.

- 2.4GHz Wireless Technology
- Class II Laser Rated
- Versatility and Convenience
- Built-in Timer and Motion Sensor
